Project Description

For my final project, I plan on creating a small blog about my experience in this program. For this project I will use WordPress and Nisarg Theme. My goal with this blog is to make sure tha I can contniously updated it on a weekly basis. I am not creating anything over the top but I plan on updating it as I keep on studying throughout the program. For the moment I plan on including just one picture and also a navbar that contains a home button that directs you back to the main page. I will also include a blog button in the nav bar that takes you the blog posts are, and final a contact us. I will also include a direct link to my past projects(Github,etc...). My audience will anyone thinking of studying Web Development and anyone who might want to contribute to my projects.

Blog

Conact

My TODO list:
- Install that application on a suitable server.
- Customize pre-existing theme,For themes I went with Nisarg.
- I plan on including media(Pictures and videos)
- Include a conact card and able to attach files
